Discover SmartAccess

Automate your sports venue with the complete online management system

Access control / On-site security / Lighting control / Multi-site management / Online bookings / Membership

More bookings. Less hassle.

ClubSpark's SmartAccess system is the stress-free way to manage your online bookings, payments, membership, and access.

Secure. Smart. Accessible

ClubSpark has partnered with CIA Fire & Security to deliver courts, pitches or fields- whatever your sport; a flexible and reliable access system that gives complete control of your facilities. With over 30 years' experience, CIA has developed a secure system designed to meet individual venue requirements in an efficient, effective way.

Automate and grow your business without limits.

Smarter play begins here

Give players easier access

Set up schedules, booking rules and payments online and then you're ready to take bookings.

Increased revenue and members

Ensure everyone pays for their time.
Turn casual players into long-term members.

Real-time reporting and insight

View resource utilisation, facility revenue, booking patterns and more.

Safe and secure environments to play

Prevent unwanted parties accessing day or night, protecting your players and facilities.

Multi-venue management

Manage resources for multiple venues from one place. Full integration with coaching & membership.

Comprehensive resource control

Working with the latest technologies, providing you with easy light control and safe gate access.

How does it work?

Extending the functionality of ClubSpark to remotely manage and monitor access and facilities on-site.

Venue controller

Each venue has a controller that connects to the internet via 3G, 4G or Wifi. ClubSpark constantly updates the controller with booking and entry information to always ensure instant access.

The controller also monitors the health of the system and continuously feeds information back to ClubSpark. This controller can also be connected to all kinds of devices to manage automation and on site access.

Gate access

Manage multiple gates and entry points. Each gate is fitted with a pin code keypad and proximity reader which connects to the central controller and lock for the gate.

These readers allow access when a pin number is entered or a contactless NFC device is used (e.g. membership card, fob or phone). Any successful or unsuccessful attempts to access the venue are fed back to the system.

Floodlighting

Floodlighting is configured to turn on when the venues are in use. They also have the ability to allow for different warm-up and cool-down periods.

LED floodlights can be set to turn on automatically if there's a booking and when a player accesses the gate. Halogen floodlights can be configured to turn on prior to a booking and stay on if there's a concurrent booking.

Convenient and reliable

Online booking

Desktop and tablets

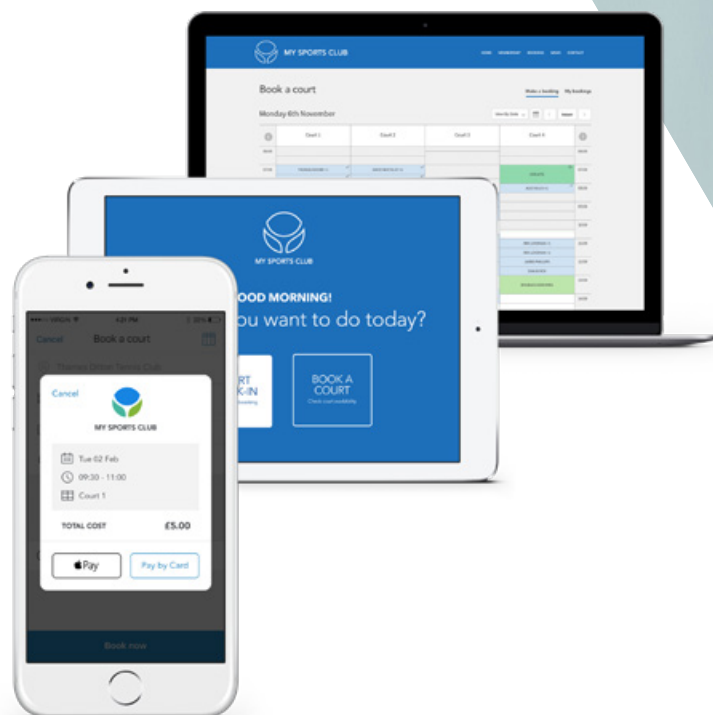

Designed and fully responsive to streamline the booking process for any device. Making it easy to book on the go, or at the gate! Your access code is delivered in seconds!

Mobile bookings

Regular players will find it even quicker to book from the mobile app and pay online using their credit card or Apple Pay.

On-site kiosks

Enabling players to rebook their next game. Simply enter your pin and book again for the same time the following week.

Player bookings made easy...

1. Visit the website, mobile app or kiosk

It's quick and easy to find your local venue online or via the mobile app.

2. Choose a venue and time to play

Select when you want to play or view the schedule to pick a place and time that works for you and pay online.

3. Receive an online access pin code

When your booking is confirmed, you'll receive a unique pin code for your booking via text or email.

4. Access the venue

Your pin code is only valid for the duration of your booking. Simply turn up and type in your access code.

5. Start playing!

You're ready to play - enjoy the game!
